

Metal Brush Wheels And Fibre stones Wheel Brush

Metal Wheel Brush

- Two metal brush wheels are fixed in the machines
- This metal wheels rotate in opposite direction with the normal RPM & helps to remove the enamel from copper as per our requirements.
- The top metal brush is movable and bottom is fixed. These wheels are fixed with main shafts and locked with threading system.

Fibre Stone Wheel Brush

- AE0054 fibre grinding wheel | 553C paint stripping nylon wheel is imported from the United States
- It is used on the OTX1 enamelled wire paint grinding machine.
- It can automatically adjust the curvature of the wire body and completely remove any hard insulating paint, enamel paint, ML, Isonel, etc.
- On the wire surface without damaging the copper (aluminum) wire itself.
- In the absence of serious pollution and harm, paint stripping work is fast and safe.
- Suitable for wire diameter range: 0.10mm-0.81
